

Lid panel installation instruction

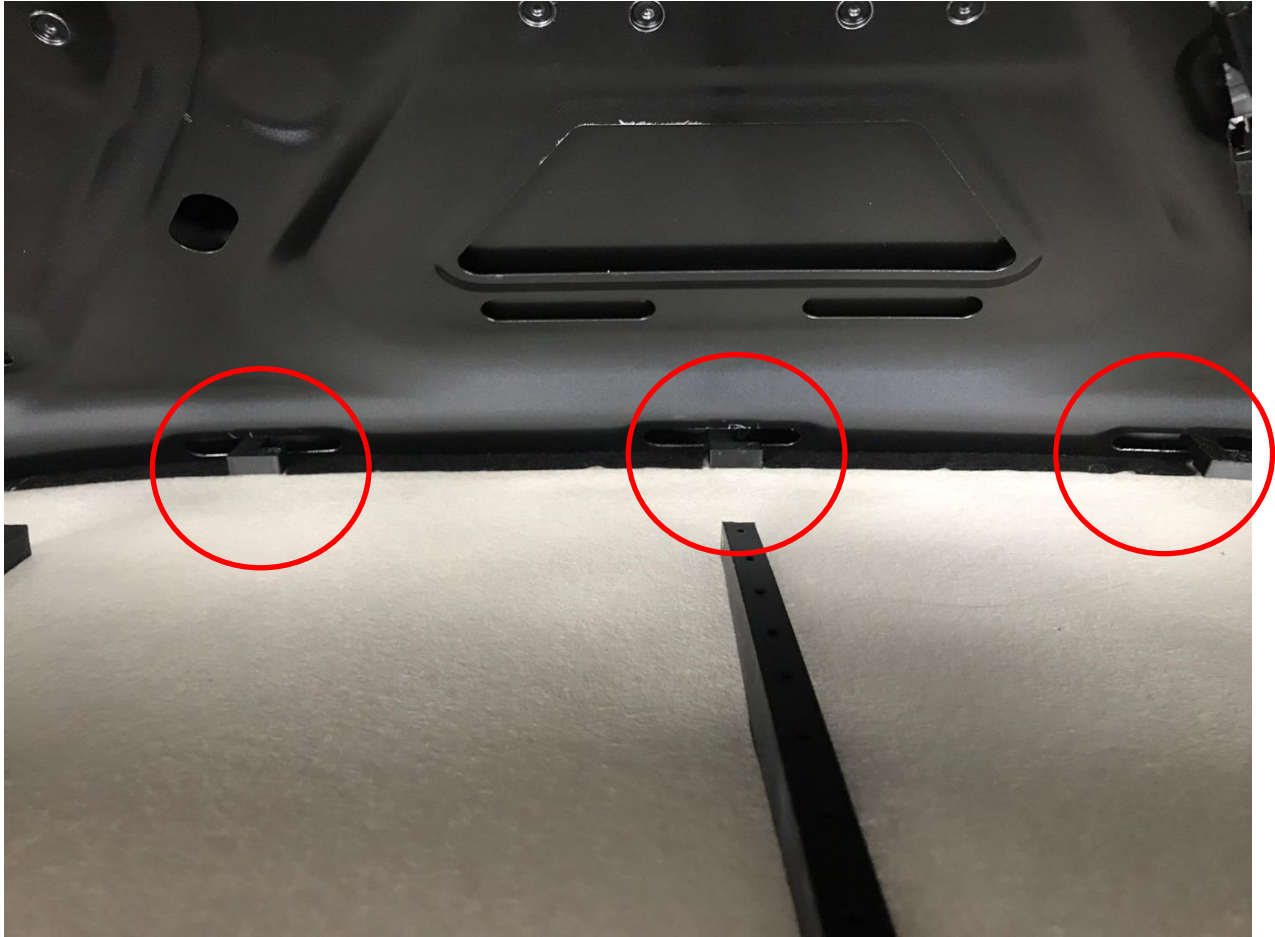

Step 1

Install two plastic brackets into the lid openings. Attach short portion (top) first, slightly bend long side and put it in place.

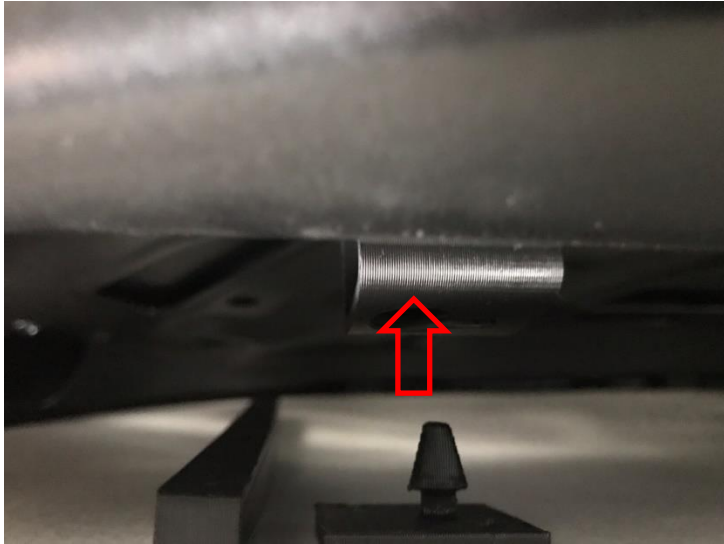

Step 2

Insert bottom clips of the panel into the three openings on the bottom of the lid.

Step 3

Insert two round plastic pins on the bottom side of the panel into the brackets.

To do this; panel must be shifted to the left for 10 – 15 mm.

Step 4

Shift the whole panel to the right, to align holes on the panel and lid and plug in two the plastic retainers.
